

Create a Custom Service for Use with ReST API

If you want to integrate with Marketo via the ReST API, you'll want to create a custom service. Here's how.

Prerequisites

- [Create an API Only User Role](#)
- [Create an API Only User](#)

Admin Permissions Required

What's in this article?

[Create Custom Service](#)

[Credentials for API Access](#)

Deep Dive

Check out our developers documentation for details on the [ReST API](#). We also have the [SOAP API](#) if that's what you need.

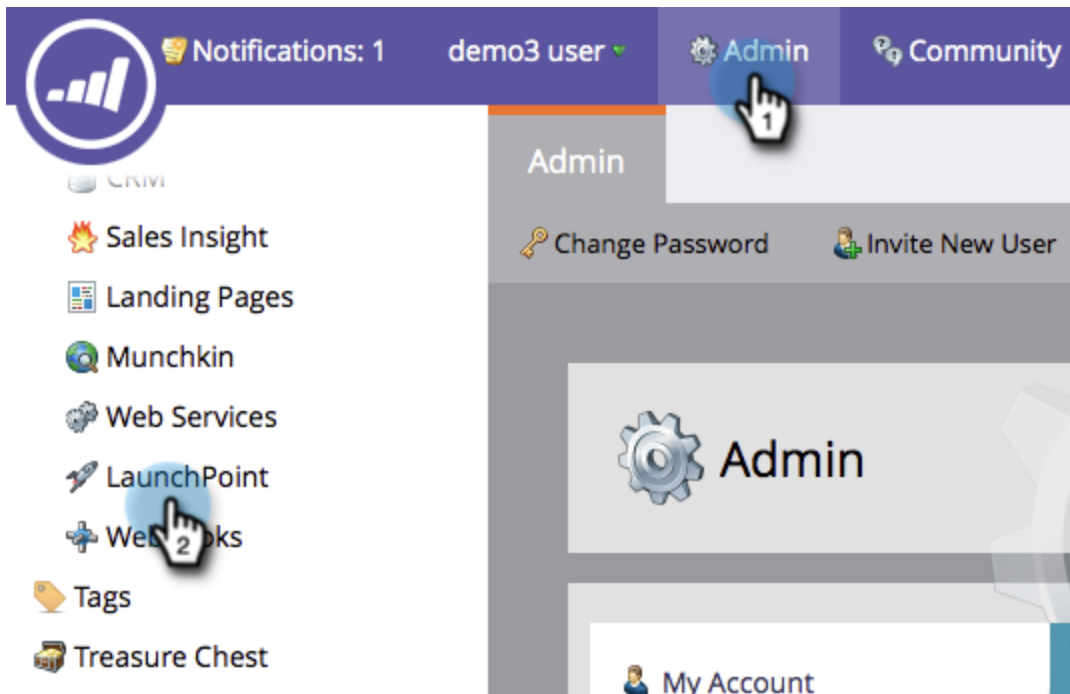

Note

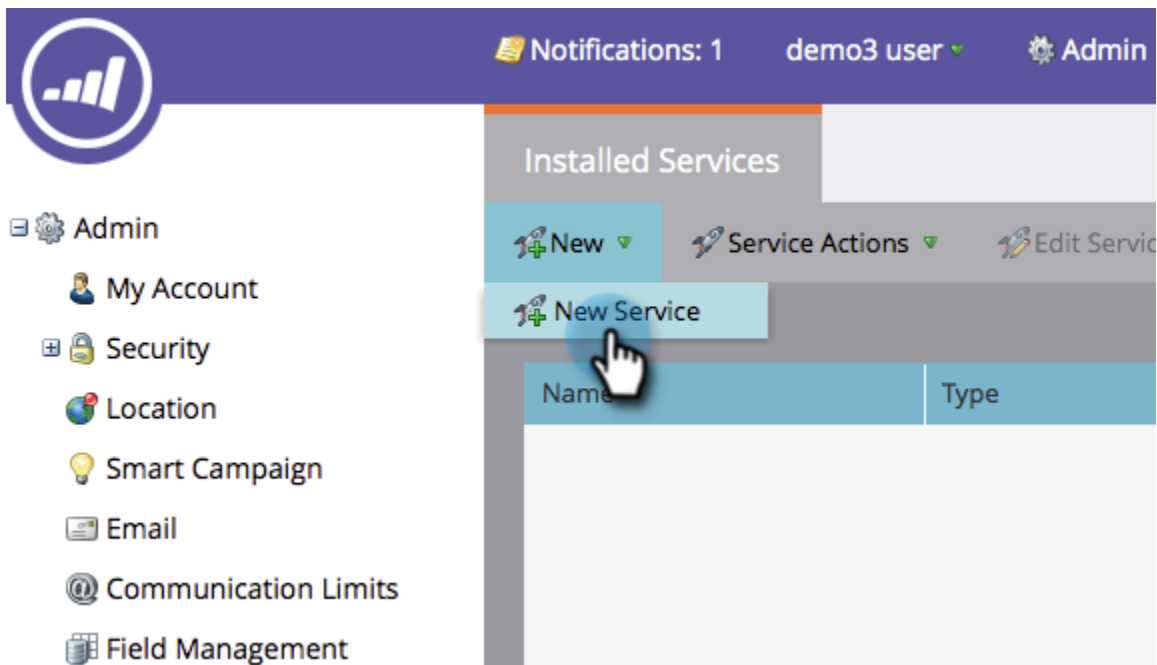

You can't create a custom service if you have the Spark level of Marketo.

Create Custom Service

1. Go to **Admin** and click **LaunchPoint**.

2. Under **New**, click **New Service**.

3. Enter a **Display Name** for the service. Select the **API Only User** previously created.

Reminder

Notice that we already have native integration for popular webinar services.

New Service ✕

Display Name: * 

Service: * 

[Learn More](#)

Settings

Description:

API Only User: * 
 

4. Click **Create**.

New Service ✕

Display Name: *

Service: * ▼

[Learn More](#)

Settings

Description:

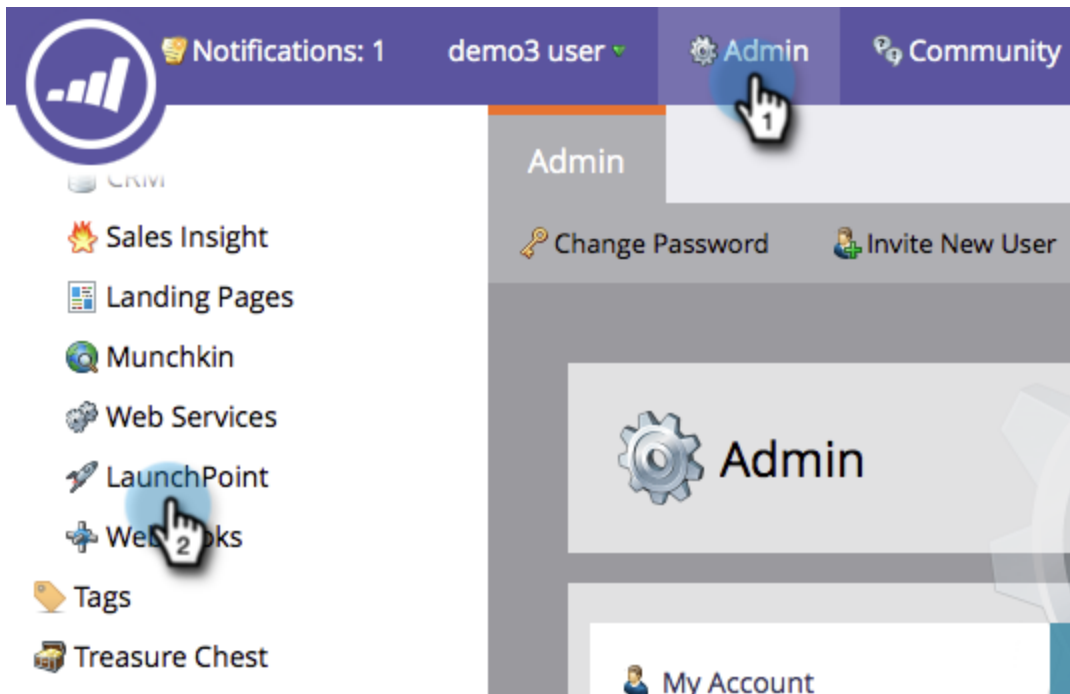

API Only User: * ▼

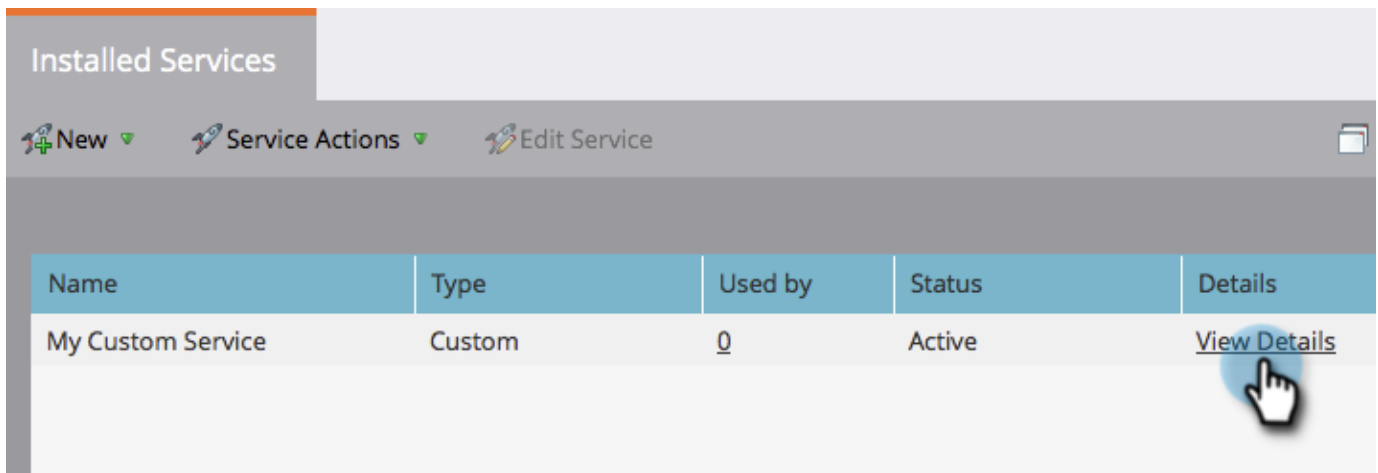

Oh yeah! The service is now created, let's go ahead and get all the credentials to provide for access.

Credentials for API Access

1. Go to **Admin** and click **LaunchPoint**.

2. Click **View Details** for the custom LaunchPoint service created above.

3. Click **Get Token**.

Details ×

Client Id: af7a1ff4-d735-4f37-a48c-be05101dba3e

Client Secret: EzWfDL4tXEJVnZR9iOhuuB9gTfVrXli

Authorized User: example@marketo.com

GET TOKEN

CLOSE

4. Provide the **Client Id**, **Client Secret**, **Authorized User**, and **Token** to the person in charge of establishing the connection.
