

# Edit the CSS of a Form Theme

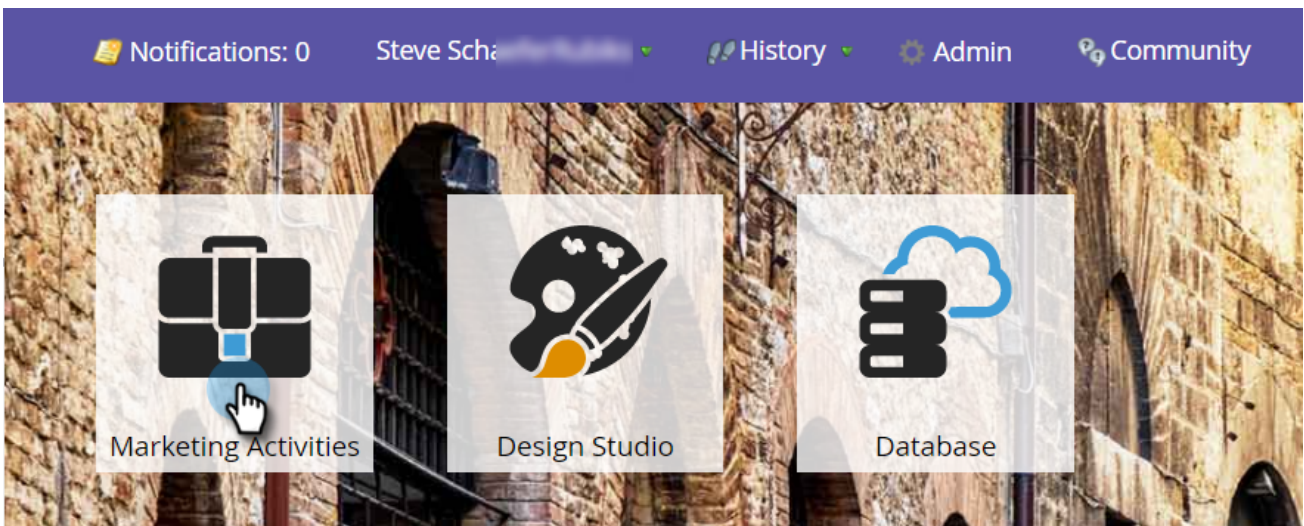

You have a few pre-built [themes you can just choose from](#). But if you love editing CSS, you can make any changes you want. Here's how.

## Note

Make sure you know CSS if you want to try this, as Marketo Support is not set up to assist with custom coding. Also, any changes made will apply only to the form you're currently editing.

1. Go to **Marketing Activities**.

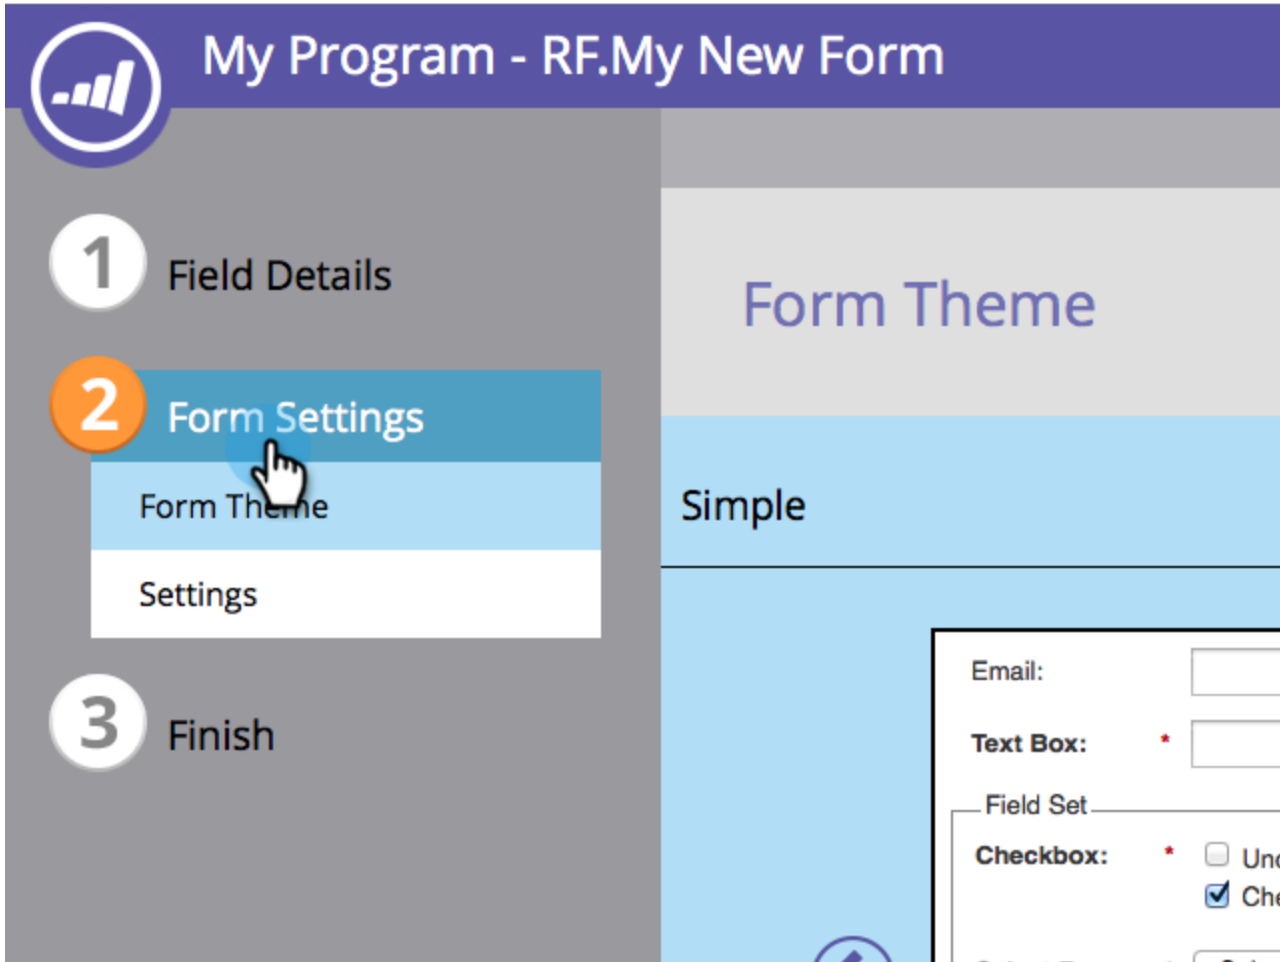

2. Select your form and click **Edit Form**.

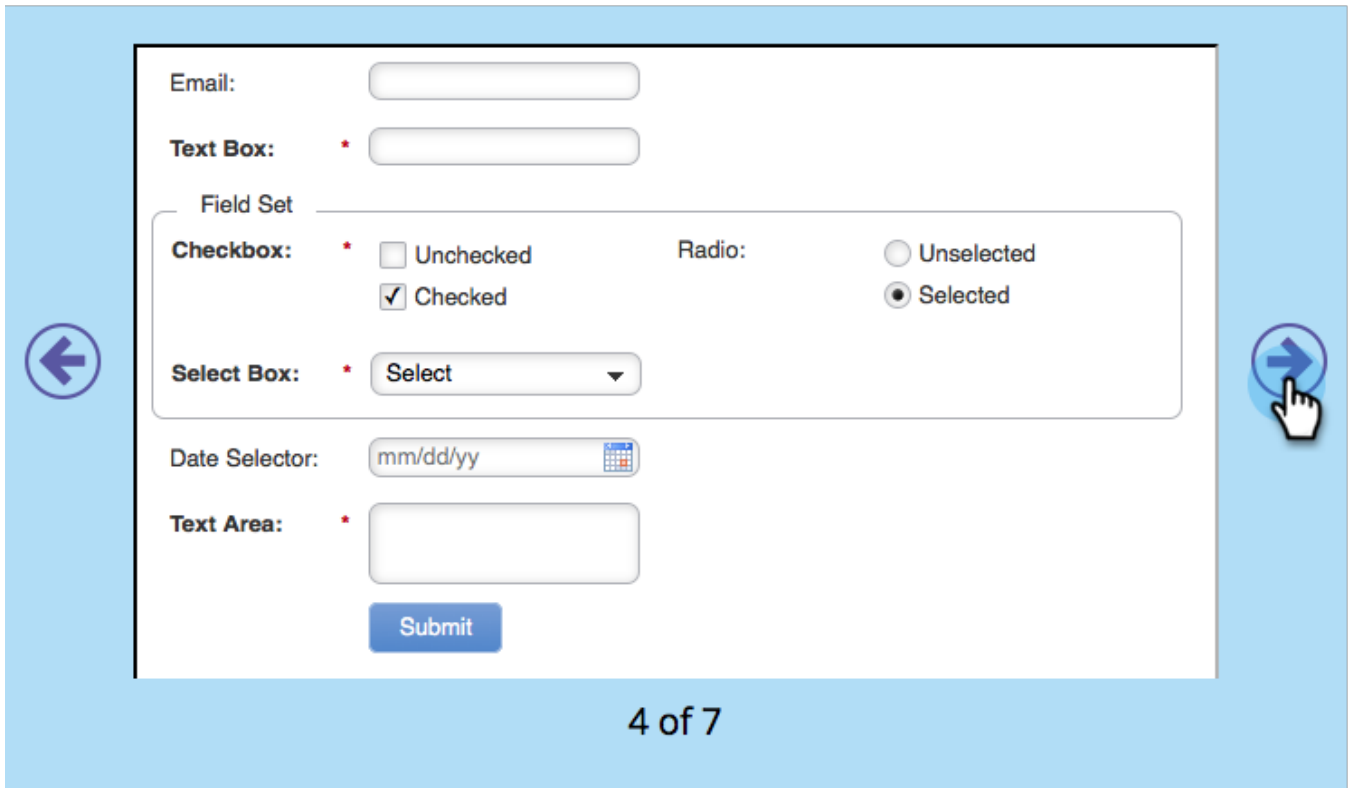

The screenshot displays a CRM interface. At the top right, there is a notification bell icon with the text "Notifications: 0" and a user identifier "demo3". The main content area is titled "My New Form" and includes two buttons: "Form Actions" and "Edit Form". A mouse cursor with the number "2" is hovering over the "Edit Form" button. On the left sidebar, under "Marketing Activities", there is a folder icon for "Learning" with a mouse cursor and the number "1" hovering over it. Below "Learning" are other folders: "Learning 03", "Nurturing", and "Scoring". The "My New Form" item is highlighted in orange. Below the main title, the form's details are shown: "Status: Approved" and "Type: Form". A partial table is visible on the right side of the screen.

3. Go to **Form Settings**.

4. Select the theme you want to make changes to.

5. Under the gear icon, click **View Theme CSS**.

6. Feel free to cut/paste this CSS to your own editor. It's read-only, so you will only need the override CSS.

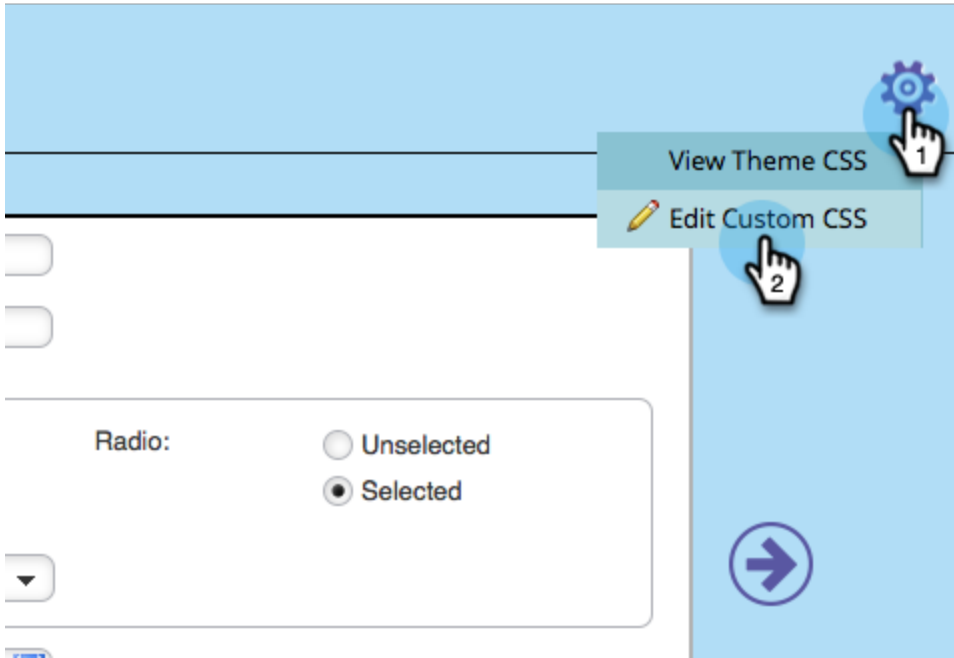

## View Round CSS

```
1 #mktoStyleLoaded {
2   /* css load detection, do not remove */
3   color:#123456;
4 }
5
6 .mktoForm fieldset {
7   border:1px solid #aeb0b6;
8   -webkit-border-radius:7px;
9   -moz-border-radius:7px;
10  border-radius:7px;
11 }
12 .mktoForm fieldset legend{
13   padding:0 1em;
14 }
15
16 .mktoForm input[type=text],
17 .mktoForm input[type=url],
18 .mktoForm input[type=email],
19 .mktoForm input[type=tel],
20 .mktoForm input[type=number],
21 .mktoForm input[type=date],
22 .mktoForm select.mktoField,
23 .mktoForm textarea.mktoField{
24   -webkit-appearance: none;
25   background-color:#fff;
```

7. Click **Close**.

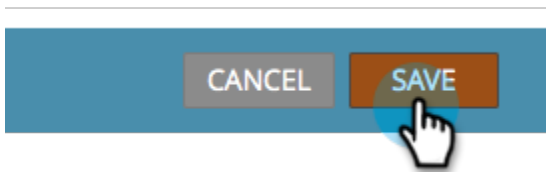

8. Under the gear icon, click **Edit Custom CSS**.

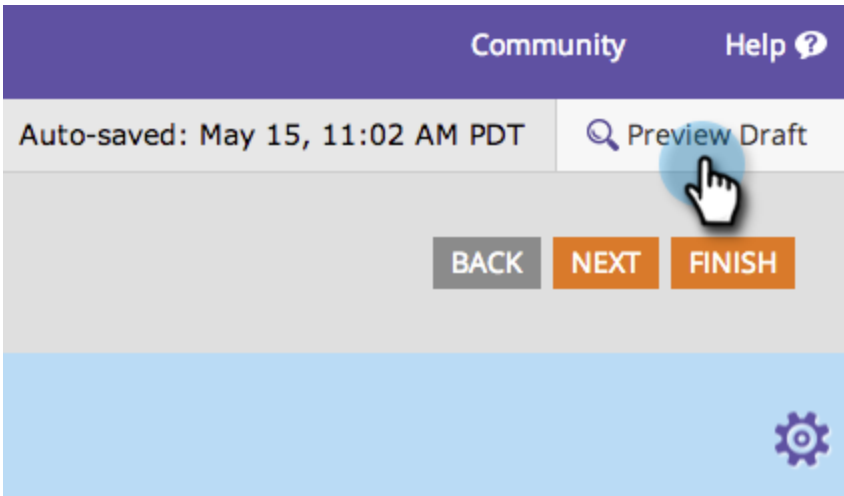

9. Enter your custom CSS. You don't need all of it, just the parts that are different.

10. When you're done, click **Save**.

11. To see your customized form, click **Preview Draft**.

And that's that!
