

Restrict Marketo Logins Based on IP

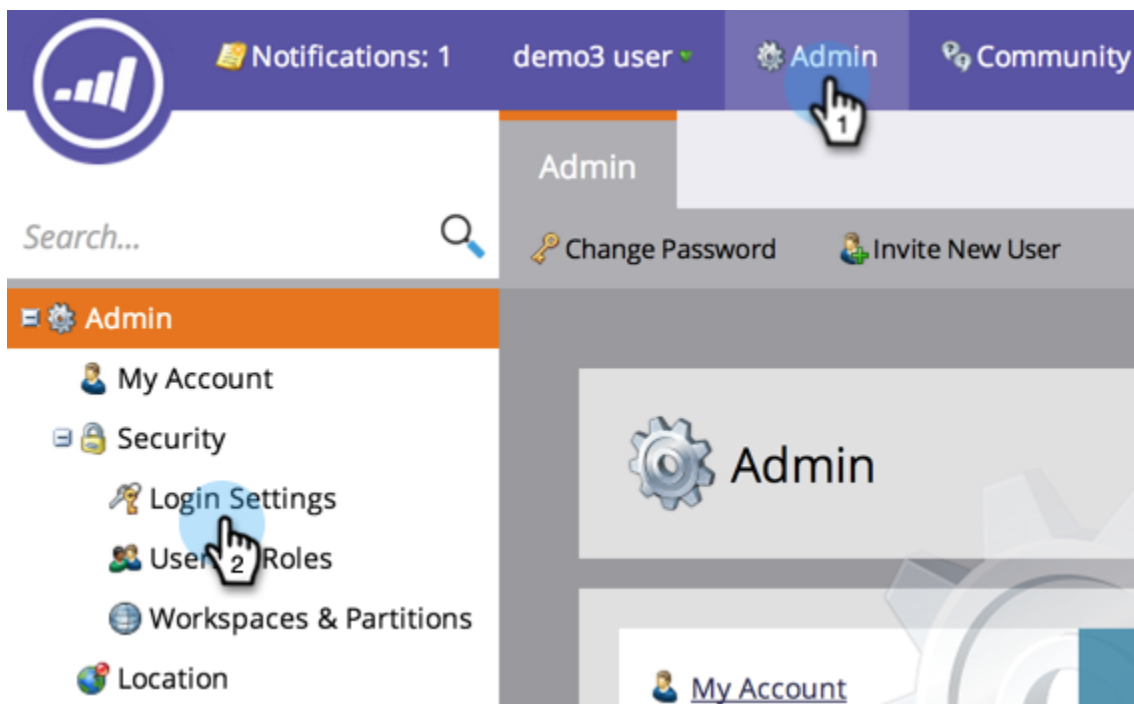

You can restrict or enable users from accessing Marketo based on their IP addresses. Here's how.

Admin Permissions Required

Note

The information in this article only applies to direct log-ins at login.marketo.com. It is not possible to enforce IP restrictions on single sign-on (SSO) log-ins at this time.

1. Under **Admin**, click **Login Settings**.

2. Click **Edit IP Restrictions**.

Login Settings

Edit Security Settings Edit URL Expiration Edit IP Restrictions

Login Settings

Manage password and security settings

Security Settings

EDIT

Minimum Length:	6 characters
lowercase or UPPERCASE:	✓
Numb3r:	✓
MixED CaSe:	
Special Ch@racter:	
Expiration:	Never

3. Choose whether you want to **Allow** or **Block** specific addresses, enter the address(es), then click **Save**.

Definition

- **Allowed IP addresses:** Adding allowed IP addresses is inclusionary. It will include all of the IP addresses specified and exclude everything else.
- **Block IP addresses:** Prevents specific IPs from accessing Marketo.
- **Disable IP Restrictions:** Checking this will stop any/all restriction rules from working. Use this for testing purposes.

Note

You can add multiple restrictions, but they can only be ALL allowed or ALL blocked. You cannot mix and match allowed and blocked.

Edit IP Restrictions

Allowed IP addresses

Blocked IP addresses

Enter IP addresses:

Examples: 192.168.1.1

192.168.1.1-192.168.1.100

192.168.*.*

10.0.16.1

ADD

Disable IP Restrictions

CANCEL

SAVE

Nicely done, your marketing data is now safer than it ever was!
