## Prerequisites

[Integrate RTP with Google Universal Analytics](#)

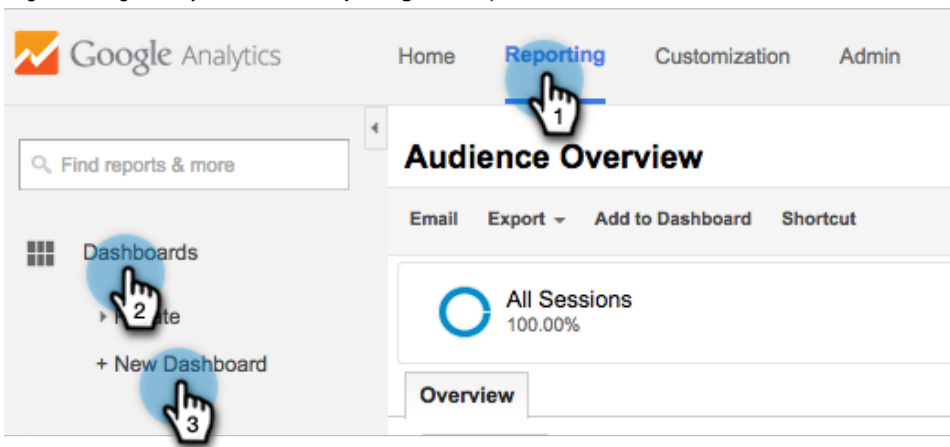

This post explains how to setup RTP dashboards in Google Universal Analytics (GUA).

The data sent from RTP to GUA can be set up as two separate custom dashboards called:

- RTP B2B
- RTP Engagement

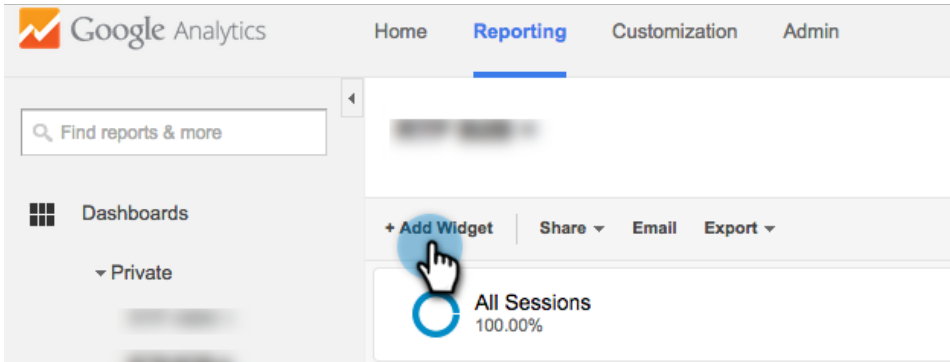

## Setting up a Custom Dashboard

1. Login to Google Analytics. Click on **Reporting** in the top menu. Click **Dashboards** and **+New Custom Dashboard**.

2. Select **Blank Canvas**, add a **Dashboard Name** and click **Create Dashboard**.

3. Click **Add Widget** to create a new widget.

## RTP B2B Dashboard

This dashboard allows users to analyze their website performance from a B2B perspective.

It provides information like visit source and onsite behavior by industry, revenue, size, Account-Based lists, and target segments.

The dashboard consists of 3 columns

- Traffic source
- Segmentation
- Firmographic drill down

1. Create a new dashboard called **RTP B2B Dashboard** and define the following widgets:

Sessions by Segments and Chan... ✕

# of RTP Segmented Users
