

Edit Your Default Branding Domain

Editing your default branding domain is the first step in working with branding domains.

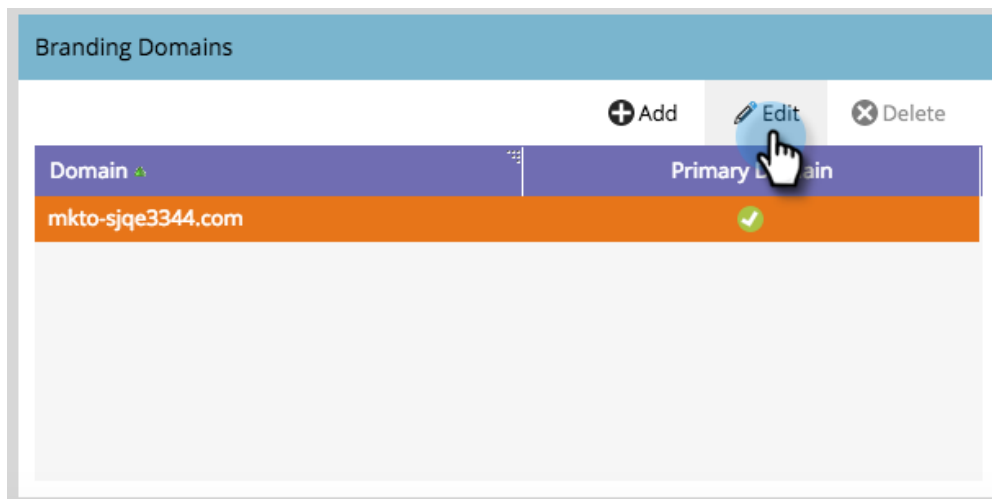

Prerequisites

Make sure you've [set up a CNAME in your DNS](#) before you add your branding domains in Marketo.

1. Go to **Admin** and click **Email**.

2. In the Branding Domains table, select the generic domain and click **Edit** to change it to your company's branded domain.

Note

You can't add an additional domain until you've first edited the generic domain.

3. Enter the name of the your default domain and click **Save**.

Edit Branding Domain ×

Domain: * qe.marketolive.com

Make Primary Domain

CANCEL BACK SAVE

Now, you can [add any additional branding domains](#) you need.
