4. Enter a note in the yellow text box. Clicking outside of the text box will save the note.

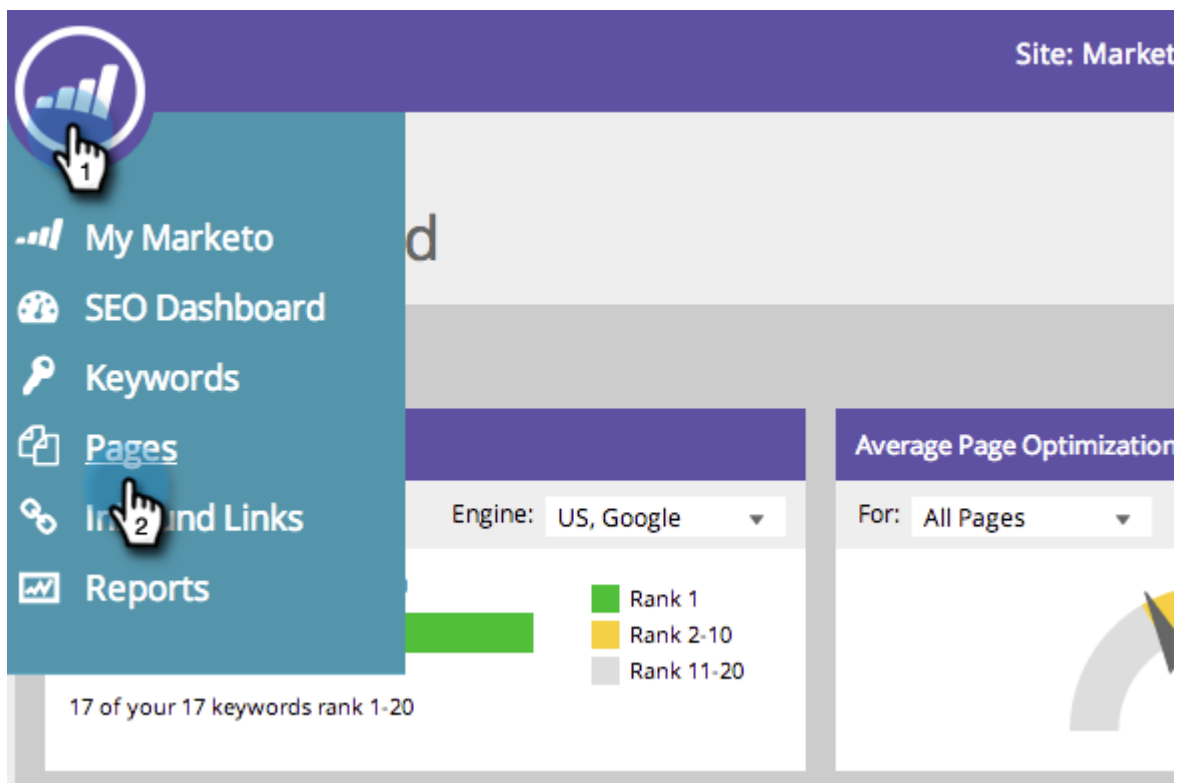

The screenshot shows the Marketo Pages interface. At the top, there is a purple header with a logo on the left, "Site: Marketo" with a dropdown arrow, and "Mark" on the right. Below the header, the word "Pages" is displayed in a large font. There are two tabs: "Pages" and "Issues", with "Issues" being the active tab. Below the tabs, there is a filter bar that says "Show: All | High | Medium | Low | Change Page Title x". The main content area shows an issue titled "The page title does not use target keywords" with a URL "http://blog.marketo.com/2006/12/7/lead_nurturin.html". Below the issue title is a yellow text box containing the note "@Ted: Can you change this page title?". A small pencil icon is positioned over the text box, and a small 'x' icon is in the top right corner of the box. A red pushpin icon is located to the right of the text box.

Tip

You can delete your note by clicking the small x in the upper left hand corner.

Add Notes in Page Detail Drill Down

1. Go to the Pages section.

2. Click on the page you wish to see details for.
