

Using Revenue Model SLA Stages

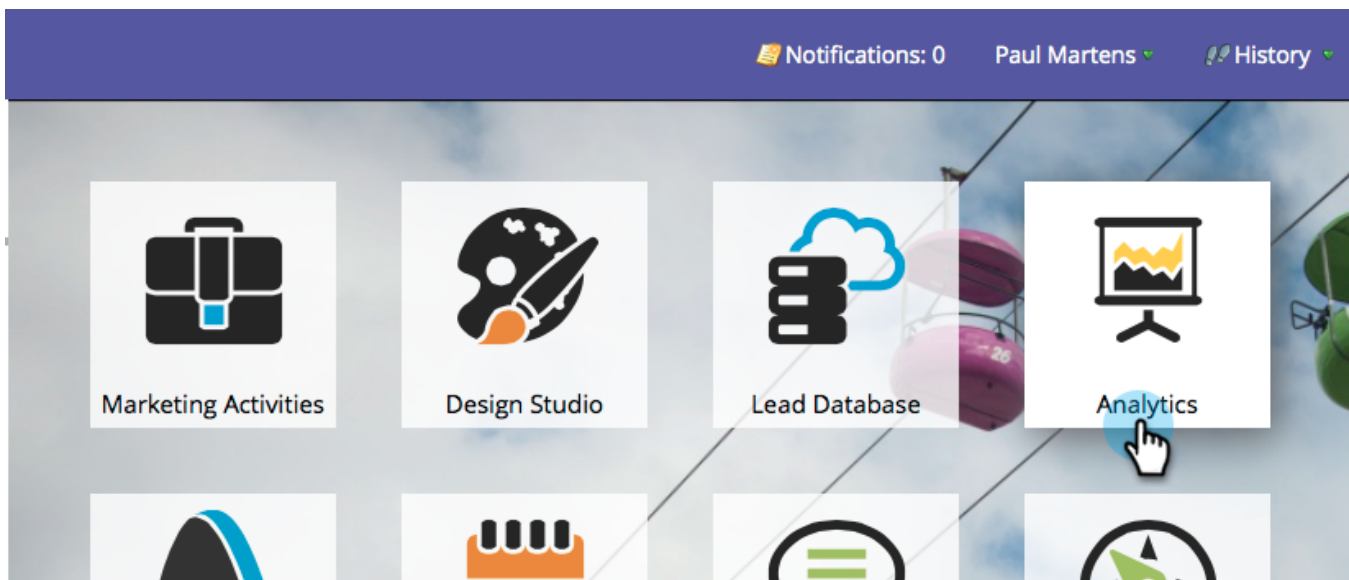

SLA stands for “service level agreement.” These stages are used when there is a defined maximum time in which a lead needs to be evaluated or processed before moving forward or out of the process.

Tip

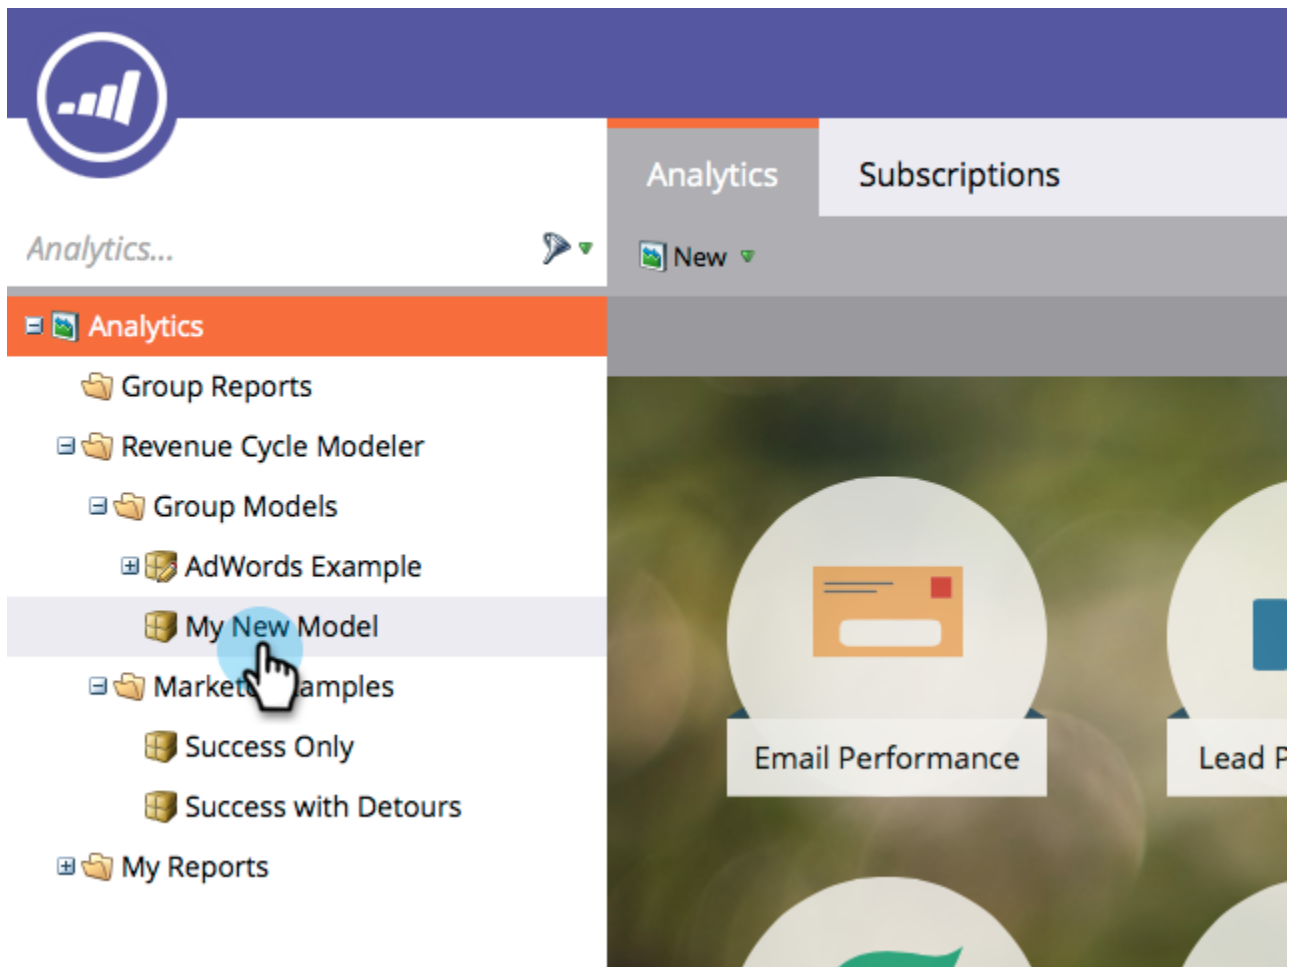

It's a great idea to create a practice model in a graphics or presentation program and confirm it with your colleagues.

Add An SLA Stage

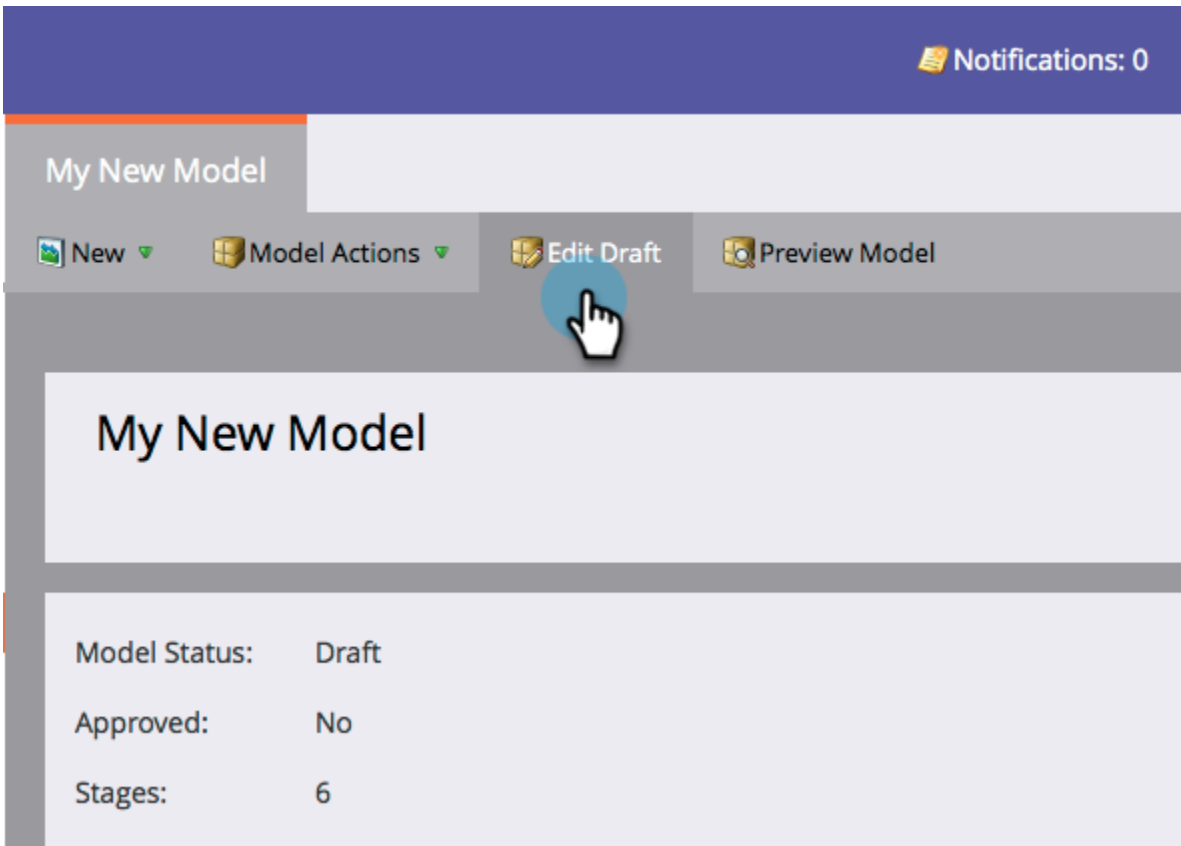

1. To add a new Revenue Cycle Model SLA stage, click the **Analytics** button in the My Marketo home screen.

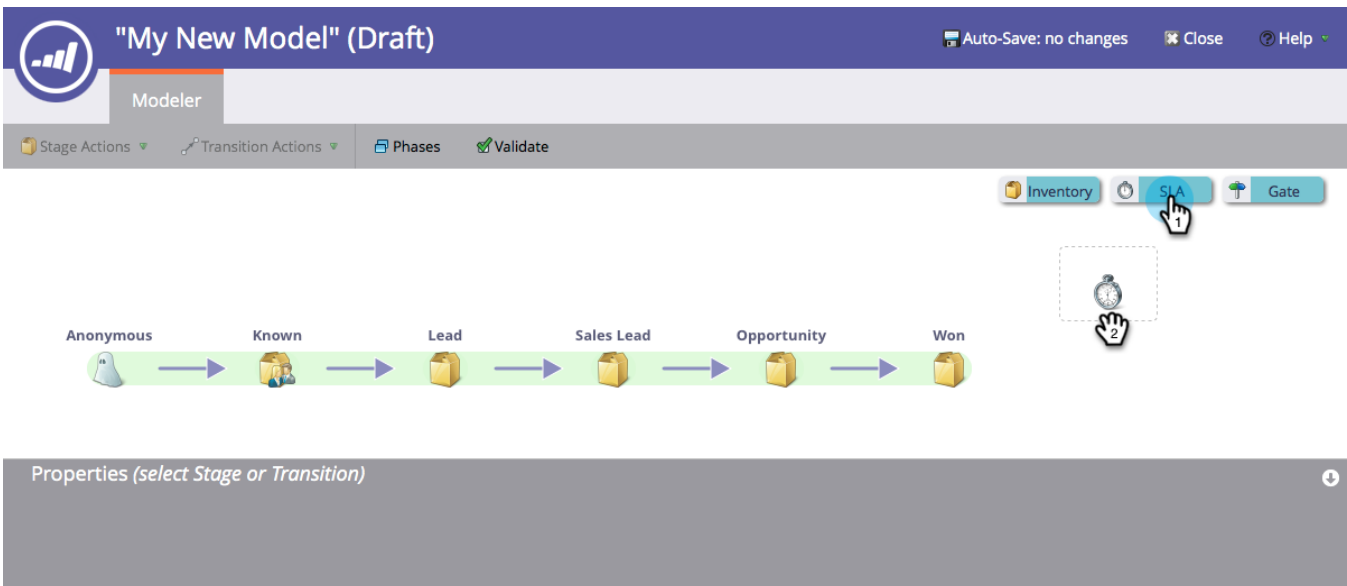

2. In the Analytics section, select your existing model, or [create a new one](#).

3. Click **Edit Draft**.

4. To add a new SLA stage, click the **SLA** button, then drag and release to anywhere within the canvas.

5. You are free to edit the **Name**, add a **Description** and adjust the **Type** after adding a stage. You may also select **Start Tracking by Account** at this time.
