

Create an API Only User Role

If you want to integrate with Marketo via the [REST API](#), the best practice is to [assign a user the API Only role](#) and then [create a custom service for use with ReST API](#). Here's how to create the API only user role.

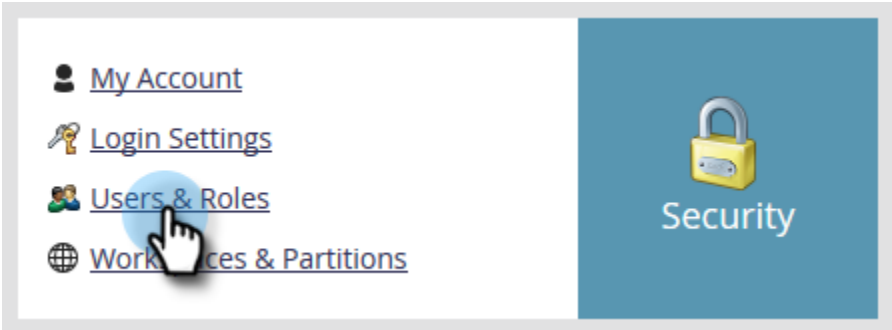

Admin Permissions Required

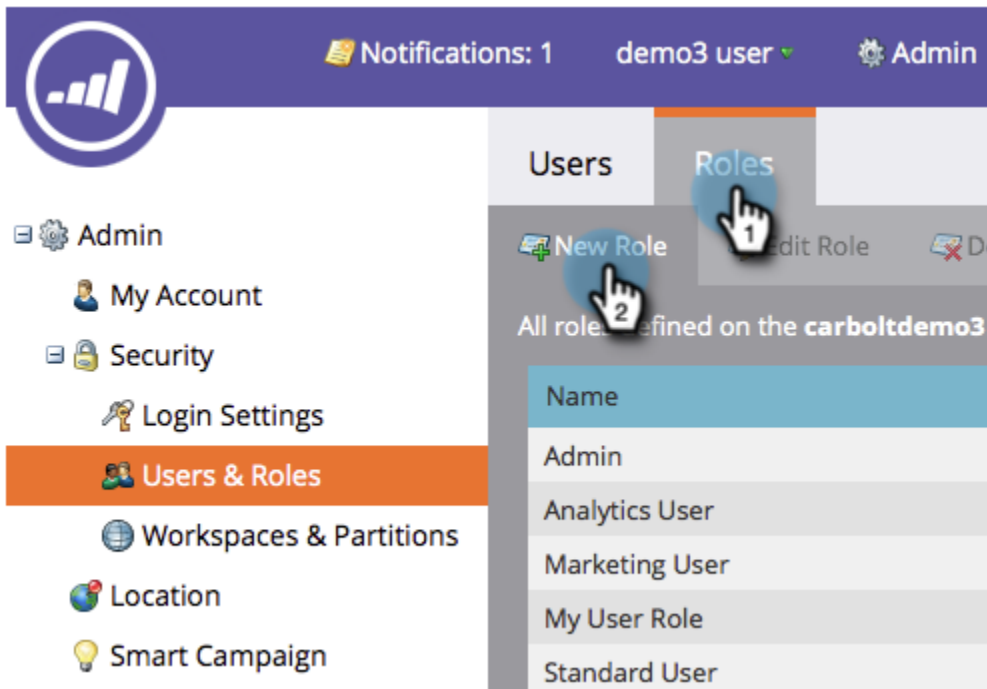

1. From My Marketo, click **Admin**.

2. Under Security, click **Users & Roles**.

3. Click the **Roles** tab and then **New Role**.

4. Enter a Role Name, select the API access Permissions you want to give, and click **Create**.

Create New Role

Role Name: *

API Only Role

Description:

Permissions:

- Access Admin (0 of 26)
- Access API (8 of 8)
- Access Ghost Admin (0 of 3)
- Ghost (0 of 2)
- Access Analytics (0 of 4)
- Access Design Studio (0 of 31)
- Access Lead Database (0 of 13)
- Access Marketing Activities (0 of 8)
- Workspace Administration (0 of 7)

CANCEL

CREATE

Tip

It's always a good idea to only grant the minimum permissions required.
