

Add a FieldSet to a Form

Fieldsets are cool. They group a bunch of fields together. You can control a whole block at once too!

1. Go to **Marketing Activities**.

2. Select your form and click **Edit Form**.

The screenshot displays a CRM interface with a purple header bar. On the left is a navigation menu with a bar chart icon at the top. The menu items are: Marketing Activities, Learning, My Program - RF, My New Form (highlighted in orange), My Learning Page, Learning 02, Learning 03, Nurturing, and Scoring. A mouse cursor labeled '1' points to 'My New Form'. The main content area has a title 'My New Form' and two buttons: 'Form Actions' and 'Edit Form'. A mouse cursor labeled '2' points to 'Edit Form'. Below the title, the form's details are shown: Status: Approved (with a green checkmark icon) and Type: Form. On the right side, a table is partially visible with columns for Status, Summary, Created, Last, and Used.

3. Click the + sign and select **Fieldset**.
